

Portable Scanning Integrated With Sage 50 Inventory

Our portable scanning system seamlessly integrates all inventory and stock control activities with existing data in your Sage 50 Accounting, Stock, SOP & POP.

Next-generation technology eliminates the need for any parallel database or third-party module, adding functionality between Sage 50 and a handheld scanner.

Our clients say the results are impressive.

Operating the scanner is intuitive as it mirrors functionality of Sage 50 and with no parallel database to slow communications; the speed of operation is ultra-fast.

As an authorised Sage Business Partner and Developer, we have successfully served demanding customers for more than twenty years, with numerous industry awards for our excellence and services to industry.

Delivering cost savings and productivity improvements

Stock Takes

Operators carry out a stock take, quickly and accurately.

- **Blind.** A simple, accurate stock take of actual quantity counted
- **Spot Check.** Real-time confirmation of accurate stock levels, for additional security and supervisory control

Purchase Orders

- Order new stock from a single bar code scan or from data held in Sage 50: Operator scans and picks quickly, eliminating the need for written notes.

Dispatching goods

- Quick and accurate stock adjustments from Sage 50 SOP.
- Correct items are accurately matched to the picking list.
- Only correct items are picked and sent to the Customer.

Goods In

- Goods can be quickly booked into stock and Sage 50 as a stock adjustment.
- Ad-hoc deliveries are quickly and accurately booked in.
- Goods are booked in as your Sage POP is expecting.
 - **"Deliver"**. Simply confirm from a list that Sage 50 presents, or `
 - **"Amend"**. Quickly amend quantities by supplier and Purchase Order

Stocking the warehouse

- Update Sage SOP from a portable scanner.
- Record the movement of stock in real time – saving time.

Sales Order Picking Lists

- Merchandise is quickly and accurately picked from Sage SOP.

Create Sales Invoices

- Create accurate invoices from a portable bar code scanner on the go: Reduce the time and cost of raising invoices.

Reduce costs, increase accuracy & seamlessly integrate your inventory with Sage 50
